

WiFi-Link

Outdoor WiFi antenna & 4G router

The companion that lets you connect all your devices around the pool to the internet.

- **Connect up to 25 devices:** all your pool's connected objects, and much more.
- **Long range from 20 to 50 metres:** to cover a large area around your pool area.
- **Dual function WiFi antenna and 4G router :** connect all your objects to WiFi via your internet box with a cable, or in 4G with a Nano-SIM card.
- **Offers speeds of up to 150Mbps:** WiFi-Link deploys a 2.4GHz WiFi signal and offers a high-quality connection.
- **Waterproof standard IPX6 :** your WiFi-Link is protected from moisture and splashes for outdoor installation.

GUARANTEE

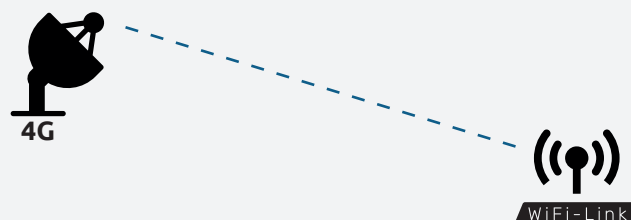

WiFi-Link **2 YEARS**

2 SOLUTIONS :

- ① Using the WiFi-Link as a wired antenna (WiFi)

- ② Using WiFi-Link with a SIM card as a 4G router

DEPLOY THE INTERNET IN YOUR GARDEN

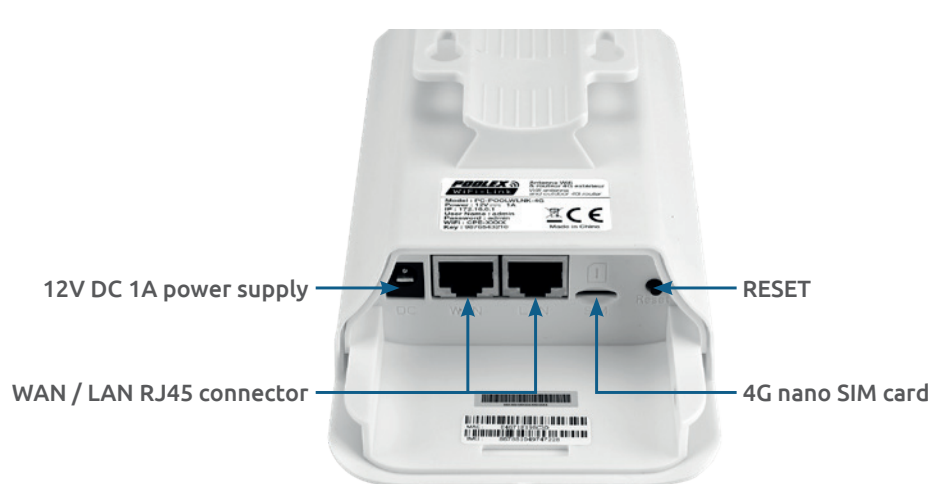

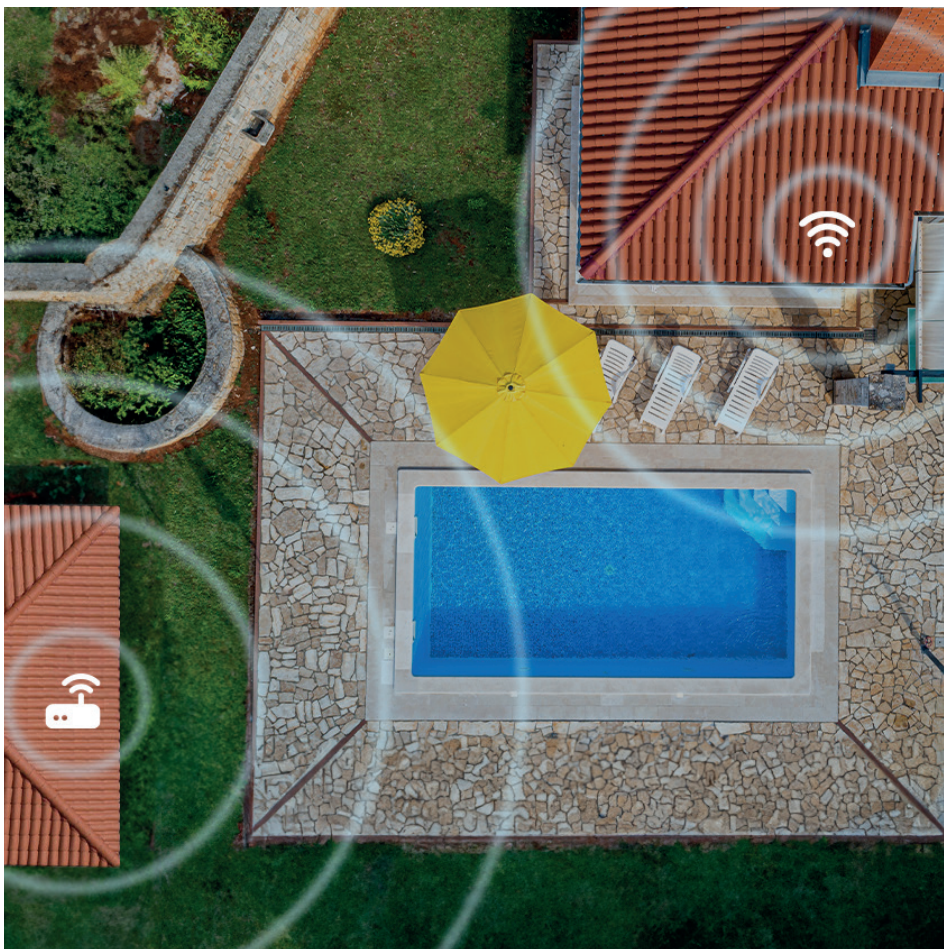

WiFi-Link makes it easy to set up WiFi access in your garden and around the pool. Connect all your WiFi pool devices such as your heat pump, circulation pump, pool robot or lights, water treatment system, and even any other devices that need a WiFi connection (e.g. sprinkler system).

DUAL FUNCTION: 4G AND WIFI ANTENNA

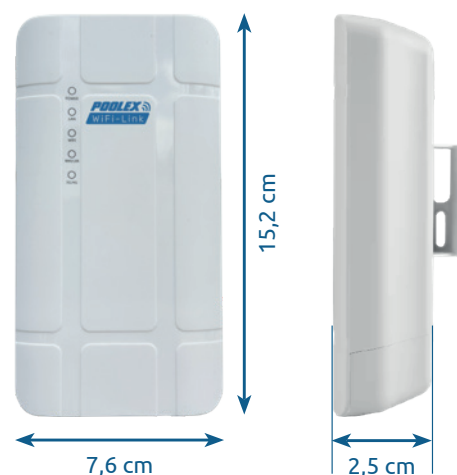

Enjoy the power of 4G by inserting a Nano-SIM card into your Poolex WiFi-Link, or connect it to your internet box or WiFi repeater via a cable. You'll then have a WiFi access point and a high-quality connection all around your pool.

EASY TO INSTALL

Plug in your WiFi-Link's power supply, insert a Nano-SIM card or connect it with an ethernet cable to your box to activate its WiFi access point. Then connect all your objects very easily using the WiFi code.
